

## **Carbonium present at the 19<sup>th</sup> Board of the Green Climate Fund**

Songdo and Paris, March 5, 2018. The Green Climate Fund (GCF) Board approved over 1 billion USD in funding for climate mitigation and adaptation, which is a record amount in a single GCF Board meeting. Carbonium's repeated presence to GCF Board meetings corresponds to our increasing pipeline of advisory services in GCF projects funding and readiness support, by advising various developing countries in direct and indirect access to GCF resources, as well as key players, such as accredited entities, in the financial structuring and the development of climate change mitigation and adaptation projects.

*"Carbonium is more and more active in GCF project financing and readiness support. Our presence during the GCF Board meetings enables us to understand the key criteria for the approval of funding proposals, especially when it comes to complex project investment structuring."* says Le Ban, Partner in Carbonium.

### **About Carbonium**

Carbonium is a simplified joint-stock company specialized in the financing and development of climate change mitigation and adaptation projects. It is accredited as an Observer for the private sector to the Green Climate Fund. The company provides also intermediation services for green products and carbon allowances. Headquartered in Paris, the company has representative offices and agents in Asia (China), in Africa (Morocco and Djibouti) and in Latin America (Colombia).
